

**iPage has purchased
wind-generated
Renewable Energy Certificates
to offset 200% of the electricity
used to run their web hosting
services and office buildings.**

This commitment will allow 3,319,480 kWh of wind energy to enter into the national electricity grid from 7/1/2011 until 6/30/2013.

This purchase makes a difference for the environment and promotes our nation's energy independence. The estimated annual environmental benefit is equivalent to the carbon sequestered by 244 acres of trees or by removing 224 passenger vehicles from the road.

The Renewable Energy Certificates are supplied by leading renewable energy marketer and developer Community Energy.
